PROFESSIONAL SUMMARY

IT support and software-oriented professional with around 6 years of hands-on experience resolving hardware, software, networking, and customer support issues. Strong practical background across Windows, Linux, computer repair, peripherals, troubleshooting, scripting, and project-based learning. Builds technical projects in AI research, IoT, Arduino, wireless communication, and web applications.

CORE SKILLS

Technical Support | Help Desk Support | Computer Hardware | Peripheral Devices

Windows 10 | Linux | Microsoft 365 | Microsoft Azure basics

Python | C | C++ | JavaScript | TypeScript | HTML/CSS

Networking | Packet Analysis | Arduino | RF/nRF24L01 | IoT Labs

Communication | Customer Centricity | Problem Resolution | Learning Agility

WORK EXPERIENCE

Freelance - Creative & Tech Support Specialist (Sep 2019 - Present)

- Developed automation scripts with Python and C in Linux environments to streamline repetitive technical tasks.
- Resolved hardware, software, printer, laptop, and network-service issues through structured troubleshooting.
- Supported users with product, service, and technical questions while recommending improvements to reduce recurring issues.

Oly Drugstore - Store Manager, Night Shift (Sep 2025 - May 2026)

- Operated the facility independently while resolving customer, operational, and technical issues.
- Maintained positive customer relationships and supported staff communication and problem-solving.
- Troubleshoot hardware and software faults to minimize downtime and keep daily operations running.

PC-MANIA - Junior IT Support Technician (May 2020 - Sep 2020)

- Repaired and maintained computer hardware, printers, and peripheral devices.
- Diagnosed Windows and Linux operating-system issues and optimized device and network connectivity.

EDUCATION

Faculty of Science, Bizerte (FSB), Tunisia - Bachelor's Degree, Computer Science

Lycee Habib Thameur, Bizerte - Baccalaureat Diploma, Computer Science Track

CERTIFICATIONS

- IBM SkillsBuild - Customer Engagement Fundamentals
- IBM SkillsBuild - Information Technology Fundamentals
- IBM SkillsBuild - Apply AI: Analyze Customer Reviews
- Cisco Networking Academy - Networking Basics
- Cisco Networking Academy - IT Customer Support
- EF SET - English Certificate, C2 Proficient
- OMEGA Formation - Arduino Programming / Robotics Training
- Semrush Academy - SEO Fundamentals

SELECTED PROJECTS

AI Investment Research Platform / Trading Bots

- Built AI-assisted research and market-analysis workflows, including Telegram bot output, scoring, risk notes, charts, and simulated/paper trading feedback.

Smart Electricity Outage Notification Platform

- Created resident and admin concepts for planned electricity-cut alerts, area selection, map-based locations, multilingual UI, and schedule management.

Enterprise IT Infrastructure Lab

- Built practical labs for Linux, networking, cybersecurity, systems administration, monitoring, and troubleshooting practice.

OnePark Reservation System

- Developed a parking reservation website using HTML, CSS, JavaScript, and database-backed booking concepts.

Remote-Controlled Arduino Car

- Designed and developed an Arduino RC car controlled through a remote system, with hardware design and embedded code.

Wireless Packet Monitor / Receiver

- Built nRF24L01 wireless packet monitoring and receiving experiments with spam protection and real-time throughput concepts.

RFID Attendance and Pointing System

- Created an employee attendance system using MicroPython, RFID, and LCD display components.

Smart Bus Passenger and GPS System

- Constructed a transportation-management prototype with passenger counting and GPS tracking concepts.

LANGUAGES

Arabic: Native | French: B2 | English: C2

PORTFOLIO FOCUS

Aziz is currently building a professional portfolio platform to centralize project case studies, certifications, resume, technical writing, and freelance proof of work.
